(54) Title: HOME NETWORK SYSTEM

(57) Abstract: The present invention discloses a home network system using a living network control protocol. The home network system includes: an electric device having at least two heterogeneous function means; a network based on a predetermined protocol; and a network manager for controlling and/or monitoring the electric device through the network, the electric device including a packet processing device having one node address provided by the network manager, generating a packet having the node address, transmitting the packet to the network manager, receiving the packet having the node address from the network manager, and enabling the heterogeneous function means corresponding to a command included in the packet to execute the command.
